

KALYAN KUMAR REDDY

DevOps Engineer | SRE | Cloud Infrastructure

Bengaluru, Karnataka | kalyanreddy2097@gmail.com | +91 9573996689 | [Linkedin](#)

PROFESSIONAL SUMMARY

DevOps Engineer with 2.5+ years of experience specialising in AWS infrastructure, Kubernetes, and CI/CD automation. Reduced cloud infrastructure costs by 20% and eliminated manual deployments by introducing GitOps workflows and end-to-end pipeline automation. Experienced across the full infrastructure stack from provisioning environments with Terraform and Helm to monitoring them with Prometheus, Grafana, and SigNoz with a strong focus on building systems that are reliable, secure, and easy for teams to operate.

TECHNICAL SKILLS

Cloud & IaC: AWS (EC2, EKS, ECS, S3, VPC, IAM, ECR, ALB, CloudWatch), Terraform, HashiCorp Vault

Containers: Kubernetes (EKS), Docker, Helm, KEDA, Karpenter, Amazon ECS

CI/CD & GitOps: Jenkins, ArgoCD, GitHub Actions, Bitbucket, Git branching strategies

Observability: Prometheus, Grafana, Loki, SigNoz, Blackbox Exporter, Node Exporter, CloudWatch, Zabbix, Nagios, Distributed Tracing

Data & Streaming: Apache Kafka, PostgreSQL (Logical Replication), Amazon RDS

OS & Scripting: Linux (RHEL, Ubuntu, SUSE, AIX), Bash, Shell Scripting, VMware, Xen

Concepts: SRE, GitOps, IaC, CI/CD, Incident Management, Cost Optimisation, RBAC, Zero-Downtime Deployment, High Availability, Disaster Recovery

PROFESSIONAL EXPERIENCE

DevOps Engineer | **Cloud2Scale Solutions Pvt Ltd** Nov 2024 – Present

Bengaluru, Karnataka

- Designed and implemented CI/CD pipelines using Jenkins integrated with Bitbucket and GitHub automating build, test, and deployment workflows across a large-scale distributed service environment
- Implemented GitOps workflows using ArgoCD for declarative, zero-downtime Kubernetes deployments across production and development EKS clusters
- Managed AWS cloud infrastructure (EC2, VPC, IAM, S3, ECR, ECS, EKS) across multiple accounts ensuring 99.9% uptime and secure, scalable application hosting
- Reduced AWS infrastructure costs by 20% through resource right-sizing, Karpenter autoscaling, and Jenkins ARM64 (Graviton) migration
- Built a centralised observability stack using Prometheus, Grafana, Loki, SigNoz, Blackbox Exporter, and Node Exporter covering distributed tracing, metrics, log aggregation, and uptime monitoring across all AWS accounts
- Provisioned and managed AWS infrastructure using Terraform (IaC) ensuring consistent, repeatable, and version-controlled deployments across all environments
- Integrated HashiCorp Vault for secrets management including Kubernetes secrets, API keys, and sensitive credentials across all services
- Managed Apache Kafka clusters for real-time event streaming and configured PostgreSQL logical replication for analytics workloads
- Configured cross-account AWS IAM permissions and RBAC policies enforcing least-privilege access across all Kubernetes and AWS resources
- Standardised Git branching strategies and CI/CD workflows across multiple teams, improving deployment reliability and code quality

System Analyst (DevOps & SRE) | **Canopus GBS Pvt Ltd** Jun 2024 – Oct 2024

Bengaluru, Karnataka | Client: Kyndryl | Project: ABFRL

- Supported cloud-native application deployments on AWS with a focus on security, scalability, and cost efficiency

- Monitored AWS infrastructure using CloudWatch — analysed performance metrics and participated in cloud cost optimisation initiatives
- Maintained and improved CI/CD pipelines and release automation to streamline application deployments across environments
- Provided 24/7 enterprise-level support for 300+ production servers across AIX, SUSE, Red Hat, and Ubuntu — maintaining 99.9% uptime with zero critical SLA breaches
- Managed AIX cluster operations including LPAR configuration, POWERHA (HACMP) administration, LVM partition extension, and MKSYB backups for high availability and disaster recovery
- Monitored server health using Zabbix — proactively scaled CPU and RAM resources and resolved SSH, FTP, and NFS connectivity incidents
- Prepared Change Execution Plans (CEP) for production changes and coordinated SAP and Oracle kernel upgrades with application teams
- Provisioned servers in VMware per business requirements and managed user administration including SUDO privileges and ACL-based access control

SysOps & DevOps Engineer | Trellissoft Engineering Services Pvt Ltd Sep 2023 – May 2024

Bengaluru, Karnataka

- Deployed and managed containerised applications using Docker and Kubernetes across development, testing, and production environments
- Monitored system and application performance using Prometheus, Grafana, Zabbix, and CloudWatch — made proactive adjustments to prevent downtime and maintain SLA compliance
- Designed and implemented Grafana and CloudWatch dashboards to track real-time application health and infrastructure performance metrics
- Created and managed virtual machines using Xen Orchestra on server pools — optimised resource allocation and improved workload performance
- Implemented and maintained backup strategies and disaster recovery plans ensuring data integrity and business continuity
- Provided L2 technical support for infrastructure incidents — resolved tickets efficiently and maintained comprehensive system documentation

EDUCATION

Bachelor of Technology (B.Tech) – Mechanical Engineering

Madanapalle Institute of Technology & Science (MITS), Affiliated to JNTUA

CERTIFICATIONS

AWS Cloud Technical Essentials | Coursera (Amazon Web Services) 2023

Linux Administration Bootcamp | Udemy 2023

AWS Solutions Architect Associate (SAA-C03) | *In Progress*

HashiCorp Certified: Terraform Associate | *In Progress*
